

METALEILA

Non-ferrous metals

Company overview

Metaleila Trading Company started producing and supplying non-ferrous metals a few years ago. From the beginning, the central axis of its activities was manufacturing various types of non-ferrous metals such as copper, zinc, lead, aluminum, etc. The Company strives to become a brand in this field by carefully examining the needs of customers and markets. In Metaleila Trading Company, our main pillar is manufacturing high-quality products to gain customers' trust and satisfaction worldwide. As a result, we at Metaleila have launched up-to-date and state-of-art laboratories to examine products to ensure their quality.

Business Description

During History, humans have used many types of metals in a wide range of methods, from mintage to construction. Historians believe that the first metal used in the world was copper. Around 1500 BC, people have been able to pour liquid copper into molds, form copper for the first time, make bayonets, etc. Since then, humans have been able to melt other metals and form them as they wish. A class of metals with not much iron in their chemical composition is called non-ferrous metals; since their lack of iron, unique properties and special characteristics, they are used widely in the daily life of humans. Among these metals, copper, zinc, lead, aluminum, titanium, etc., can be mentioned. Many companies have set up production lines worldwide; among them, Metaleila Trading Company has set up progressive and mechanized production lines to meet the needs of traders and merchants in the Middle East to become a leading brand. Besides, the Company has managed to offer a diverse range of such products with the best quality.

Missions and Goals

The mission of Metaleila Trading Company is to produce unique and competitive products to gain and maintain customer satisfaction worldwide. For this purpose, we have arranged and developed Metaleila's goals according to the vision document as follows:

- Manufacturing high-quality.
- Keeping the Company's machinery and equipment up to date.
- Conducting strategic studies, development plans and monitoring the master plan of the industry.
- Constant monitoring of all stages of production, from mining to loading.
- Preparing necessary constructions to grow the quantity and quality of products.
- Making and guiding the policy of localizing industrial technology.
- Holding workshops to develop and promote the employees' skills.
- Attending international exhibitions.

Visions and Values

As a knowledge-based company using up-to-date and progressive equipment and machinery in the production line, Metaleila Trading Company strives to identify and recruit expert and competent human resources from all over the world to become a leading brand in producing a variety of non-ferrous metals worldwide. Concerning this, the Company prepared and compiled values as follows:

- Producing unique and high-quality products.
- Protecting the environment.
- Gaining and maintaining customers' trust and satisfaction.
- Prioritizing honesty and integrity in all departments of the Company.
